# Previous main steps for building the PSFS

---

- November 2022:
  - Coordination + French group
- December 2022:
  - Publication of the call
  - France positioning
  - Survey
- January 2023:
  - Information meeting
  - Final version of the SRIA

# Next steps for building the PSFS

---

- 
- ❑ Submission at the latest on **April 12th, 2023**
  - ❑ **March** : Finalising the Part B by the middle of March (for proofreading), and completing Part A (including administrative forms, budget).
  - ❑ **February**: Writing the proposal Part B with WP leaders/co-leaders and task leaders (including interactions and exchanges between WPs). Expand the consortium. Positioning partners in the different tasks considering their expertise, wishes/constraints and balance between countries/organisations.
  - ❑ **January**: Appointing WP leaders/co-leaders and task leaders to co-construct the PSFS proposal. Validate the work plan and first round of consortium partners

# PSFS building process

---

- ❑ **Survey** for participation in the future PSFS launched in December 2022 (still open)
  
- ❑ Establishment of a **core group** of organisations (already involved in the PSFS Narrative, Template, in the SRIA, have expressed interest through the survey) to co-construct the WPs, define WP leaders and expand the consortium
  - ❑ Consortium = funders + RPOs (Research Performing Organisations)
  - ❑ Only RPOs that will provide in-kind contribution and that will have an operational role could take part in the consortium
  - ❑ Not all RPOs answering the survey will be in the consortium at the end (selection to be made with the core group based on expertise, wishes/constraints and balance between countries/organisations)
  - ❑ RPOs not in the consortium will have the possibility to apply to external calls after the PSFS will be accepted
  - ❑ To be invited in the consortium the organisation must have filled in the survey

# PSFS Work plan & structure proposal

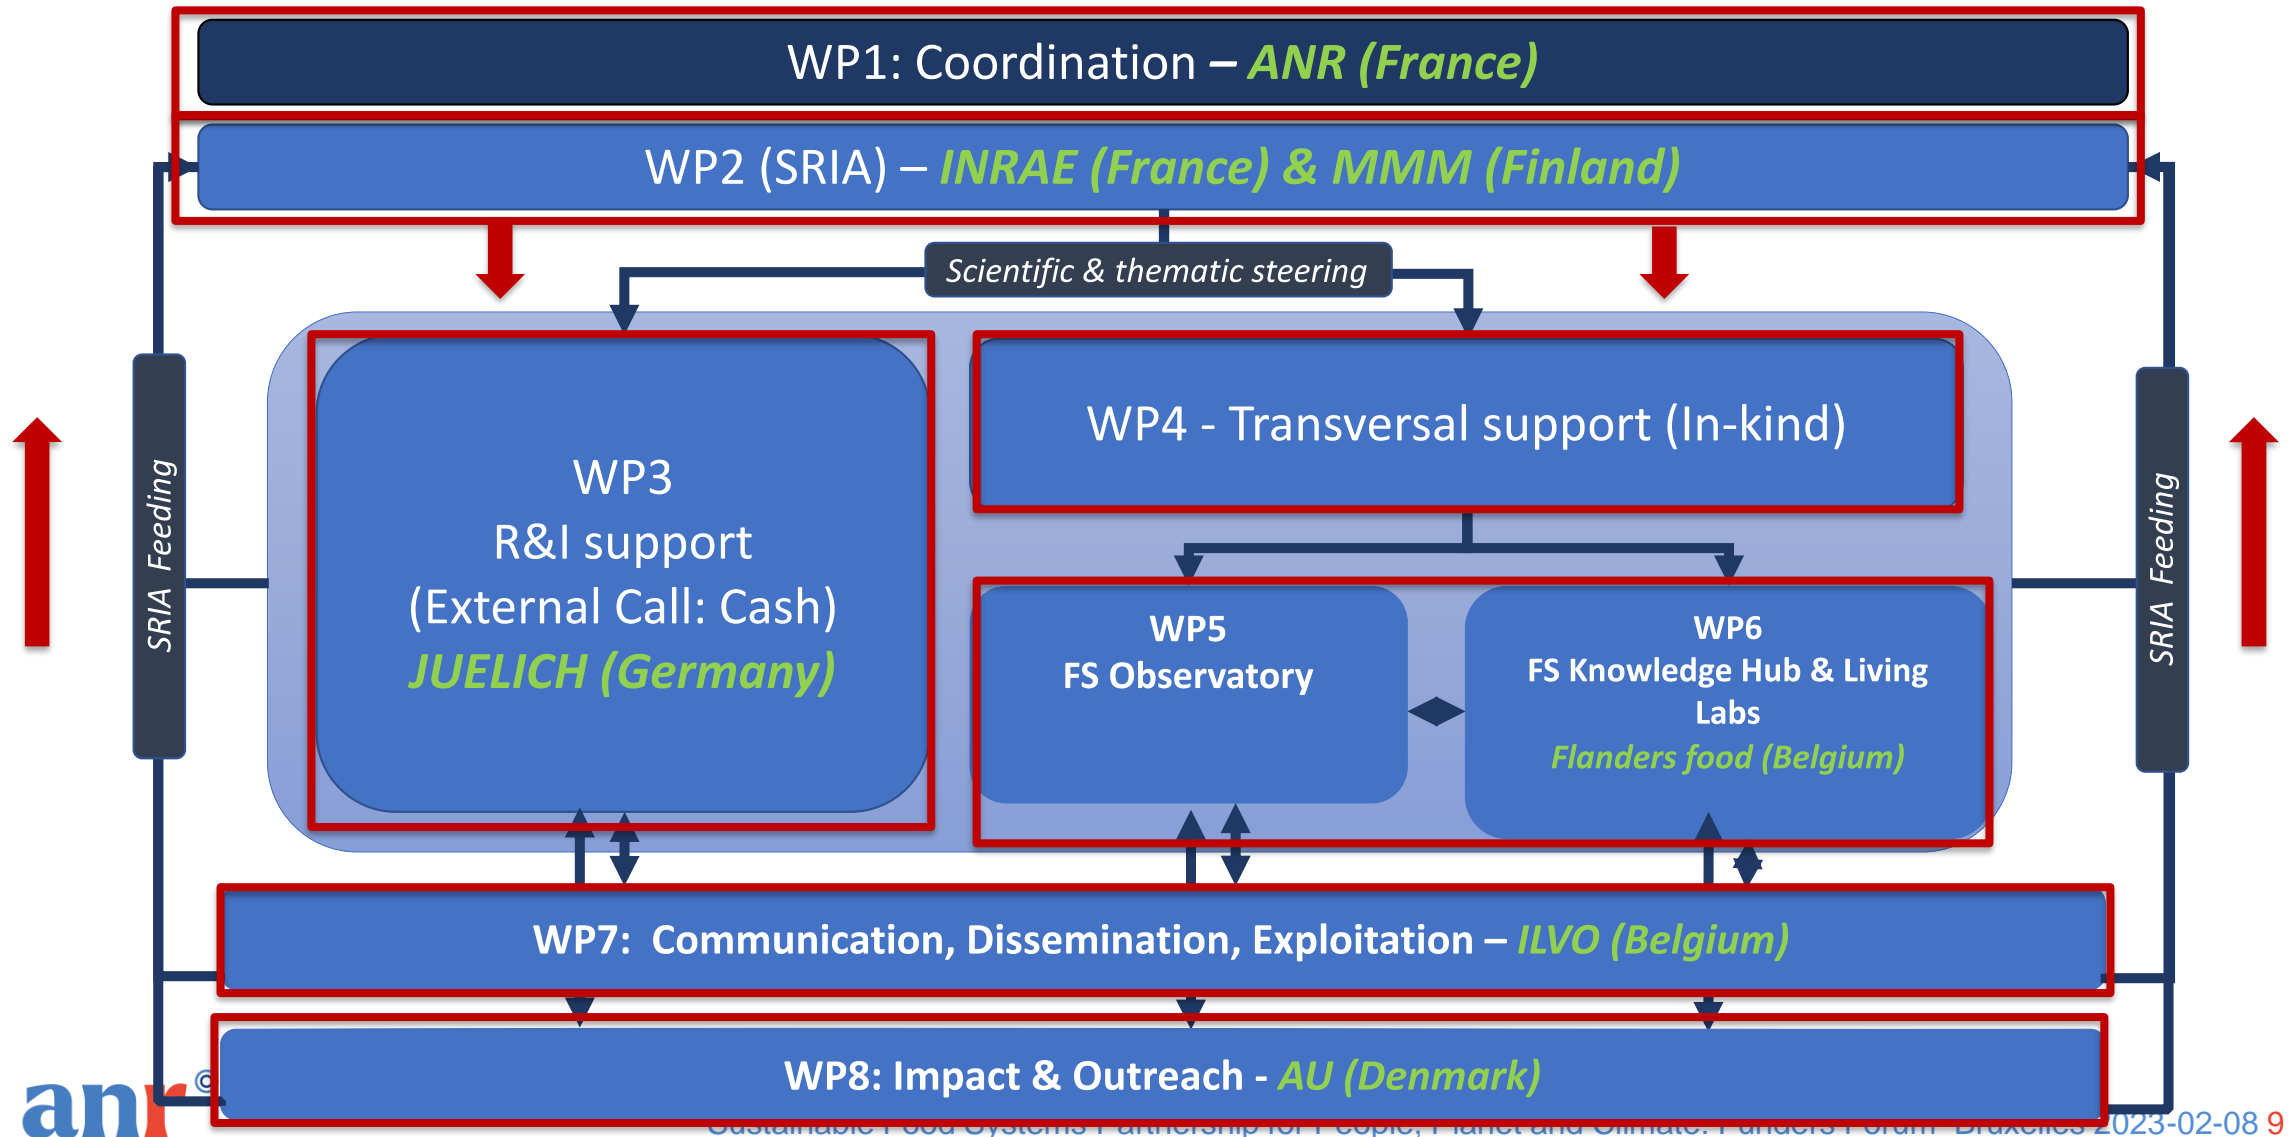

---

The approach:

- Based on SRIA
- From other launched Partnerships (BlueEconomy, Water4All, etc ...)
- To be consistent with the reference terms of the call
- Input from the core group**
